

# Spears® Thermoplastic Piping Products for Mining & Mineral Processing Applications

MMPA-2-0314

The Mining Industry Depends on Spears® Thermoplastic PVC & CPVC piping products to provide long-lasting solutions in the Most Demanding Mining Applications.

## *Spears® Thermoplastic Products Feature*

- ✓ **Outstanding Chemical Resistance**  
Non pH-limited PVC & CPVC materials resist most aliphatic hydrocarbons, acids, bases and salts.
- ✓ **Superior Corrosion Resistance**  
Thermoplastic materials are not affected by corrosive environments and maintain interior wall smoothness throughout 50+ year service life.
- ✓ **Unmatched Abrasion Resistance**  
Exhibits excellent resistance in abrasive environments.
- ✓ **High Temperature Resistance**  
Exhibits high temperature resistance in aggressive environments.

*PVC Schedule 80 Piping Products*

Spears® PVC & CPVC piping products provide time-saving easy installation and allow for effortless system expansion when required.

### *Mining Applications Include:*

- Ion Exchange
- Process Cooling Water
- Dosing
- Reverse Osmosis
- Chemical Process
- Flocculation
- Drainage
- Chemical Neutralization
- Dilution
- Electrowinning

*PVC & CPVC  
Valves*

*CPVC Schedule 40 & 80  
Piping Products*

*CPVC Corrosive Waste Drainage Systems*

# *Simply the Best!*
