Spears[®] Super Sourcebook

Your One-Stop Source For Plastic Fittings, Valves, Pipe & Cement

Welcome to...

Spears[®] SUPER SOURCEBOOK List Price & Technical Information Catalog for Plastic Fittings, Valves, Pipe & Cement - a comprehensive pricing and technical information listing of all Spears[®] Plastic Fittings, Valves , Pipe & Cement catalogued product for all your plastic piping needs. This catalog is divided into two (2) Parts:

Part I: List Prices

This part groups common categories of product and related accessories for convenient use and versatility in finding the products you need. As a result, certain products may appear in multiple categories. For example, various PVC Valves grouped with Schedule 80 PVC Fittings, CPVC Valves grouped with Schedule 80 CPVC Fittings, and both PVC and CPVC Valves being separately listed under Thermoplastic Valves. Take a few minutes to peruse the Table of Contents for an overview of organization and content. Applicable Discounts are available to Spears[®] qualified stocking wholesale distributors. Products are sold only through authorized distributors. Appendix G provides applicable Discount Codes in numerical order for product included in this catalog. A blank space is provided after each for recording applicable discounts. Contact your servicing Spears[®] Regional Distribution Center for applicable discounts.

Part I "Tab Locator" page lets you quickly thumb to each category by matching shaded tabs in the outer margin of each page.

Spears* Part Number Index allows quick page number location for pricing of Spears* standard catalogued parts. Simply look up known part number in the numerical index to find designated page on which the part can be found. Please note, certain special and custom parts are not catalogued.

See also Spears® On-line Catalog that is updated daily and can be accessed to verify pricing and check for any changes or adjustments that may occur between catalog publications. Spears® On-line Catalog can be downloaded to your personal computer for added convenience at www.spearsmfg.com

PART II: Technical Information

This part provides essential Weights & Dimensions and other Technical Information on a host of Spears[®] product lines Products are grouped according to common types, such as Schedule 40 Fittings, Barbed Inserts, Schedule 80 Fittings, Flanges, Valves, plus various Specialty Product Lines and more.

Part II "Tab Locator" page lets you quickly thumb to each information section by matching shaded tabs in the outer margin of each page.

Additional Spears® Service Features

9 Regional Distribution Centers for Immediate Shipment In by Noon - Out Same Day • Highest Complete Shipping Percentage • Customized Inventory and Shipping for Specific Customer Needs

Customer-Friendly Freight Policies

No Broken Box Charge • Low Freight Charge on Total Invoice • Combine Products for Optimum Prepaid Freight Levels

EDI Service (Electronic Data Interchange)

Automated Order Transmission • Advanced Shipping Notice • Electronic Invoicing

VMI Service (Vendor Managed Inventory) Automated Direct Computer Inventory Replenish System

In-House Technical Service Department

Professional Problem Solving Assistance for Product Use and Application

Product Seminars Conveniently Arranged for Distributors • Contractors • Engineers

Specification Aids Product Data Sheets • Engineering Specifications • Dimensional Data

Piping System Layout Software Autocad Program for System Layout and Product Selection

Individual Barcoded Fittings and Valves Including Box and Pallet Labeling for Rapid Electronic Inventory Control

Private Labeling/Packaging/Barcoding For Oualified, Volume Resellers & O.E.M.'s

E-Commerce Internet Access

Convenient Order and Account Management To Registered Customers

Spears[®] Super Sourcebook

Understanding Column Header & Configuration Information

A variety of Column Header layouts are used to list product part numbers, options, discount codes, and list price. The following are the most typical used:

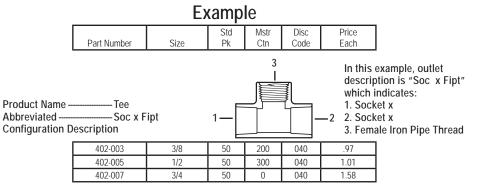

Typical Fitting Column Header label identifies the following product particulars:

The designated list price of the product.

······································
The number used to order the part.
Nominal diameter of pipe with which the fitting is to be used. NOTE: Fittings may be same size (only one size
designation) or reducing (multiple sizes designated).
The quantity of parts packaged in an individual box or bag.
The total quantity of parts contained in individual boxes or bags which are packaged together.
Identification code for applicable discount to the list price of the product. NOTE: This is a Product Group code and
is not a calculation of discount. Discount codes are not the same for all products contained in this price schedule.

Price Each

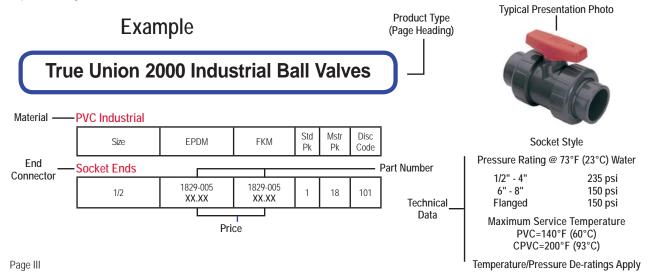

Fitting Configuration Drawings are accompanied by the product's name and an abbreviated configuration description of the fitting outlet connections. Line drawing illustrations are general representations of the fittings in the group, but may not be an exact depiction of all configurations listed. Line drawings are correlated to the configuration description. The drawing is read left to right for Elbow and Adapter configurations. Tees have an additional outlet branch and are read left to right (run) then top (branch). Drawings for Wyes and Crosses are read top to bottom then left to right and bushings drawings are read as outside x inside configuration. The configuration description also correlates to the size designation. As with the nominal size designations, only one description is given when all outlets are the same. Reducing sizes list run configuration x branch configuration.

Typical Valve Column Header label identifies the following product particulars. Headers are generally preceded by identification of material type and configuration descriptions. Again, variations exist according to product type and configurations.

Size	The nominal diameter of the pipe with which the valve is to be used.
Seal Type	Designated elastomer seal (O-ring, Seat, Diaphragm, etc.)
(i.e., EPDM, FKM)	NOTE: Part Number and List Price are typically specified under the seal type columns.
	Certain products may have other column header designations under which part number and pricing are speci-
	fied in a similar manner.
Standard Pack (Std Pk)	The quantity of parts packaged in an individual box or bag.
Master Pack (Mstr Pk)	The total quantity of parts contained in a single packaging of multiple Standard Packs.
Discount Code (Disc Code)	Identification code for applicable discount to the list price of the product. NOTE: This is a Product Group code and
	is not a calculation of discount. Discount codes are not the same for all products contained in this price schedule.

Valve Illustrations may be as photos or line drawings. Illustrations are general representations of the valve or product specified, but may not depict all configurations listed.
